

Monitor up to 3 separate seed or fertilizer loops at the same time, all conveniently located on the same App screen.

- ✓ “Take advantage of all of the features the Legend Basic system has to offer, plus these great features:”

- ✓ Add more certainty to your Section Control drill’s operation with the LEGEND ADVANCED. Be sure that active sections are seeding with active section detection. Options for Bourgault: Tank Pressure Sensors and Tank Delivery Sensors for multiple products in a single air stream.

- ✓ The Legend Advanced system can accommodate up to 240 sensors on 3 separate loops.

- ✓ Most drills using sectional technology can take advantage of LEGEND ADVANCED ‘hardware’ section sensing. This allows absolute certainty that a section of the drill is turned on or off. It requires the larger module and extra wire harness. It is available for Morris, John Deere, Seed Hawk, Seed Master and Bourgault

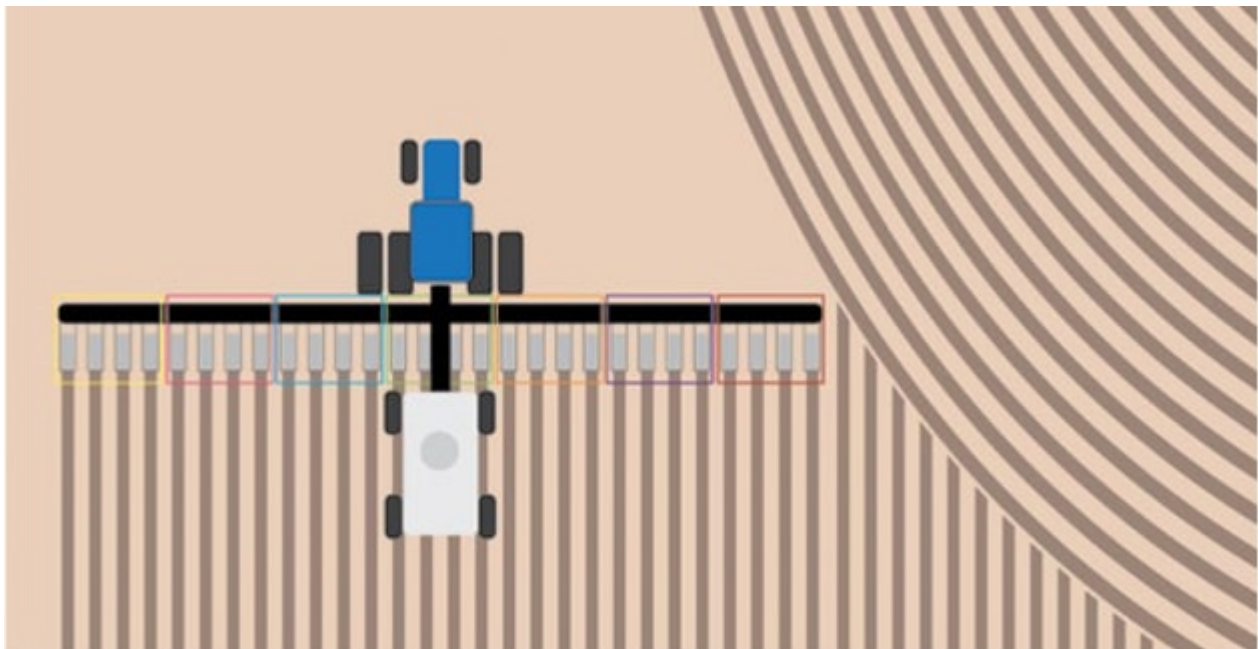

drills. CNH and other drills can use the predictive section shutoff feature (included)

- ✓ Communicate with Cart Section Control(BG, Morris, Seedhawk, Seedmaster)

- ✓ Compatible with Tank Delivery(Primary) sensors

- ✓ Ability to monitor 3 separate product loops

- ✓ Compatible with tank pressure sensors

SECTION CONTROL DRILLS

Most drills using sectional control technology can take advantage of the LEGEND ADVANCED section sensing. This allows the producer to have absolute certainty that a section of the drill is turned on or off. It requires the Agtron Advanced ECU, as well as an extra wire harness. Contact your local dealer, or Agtron, to check for available wire harnesses.
