# RIPPMASTER

## SMART DEEP RIPPING!

Take control of your deep ripping with the RippMaster, an advanced ARAG ISOBUS system that ensures optimal machine performance.

- ✓ ISOBUS Compatible
- ✓ Active Depth Control
- ✓ Wheel Slip Monitoring
- ✓ Worked Depth Mapping
- ✓ Automatic Tilt Control
- ✓ No 2nd Receiver or RTK
- ✓ Headland Control
- ✓ Up to 2 Pressure Sensors

# Smart Deep Ripping – Made Easier, Smarter & More Efficient

## Without Technology, Deep Ripping Often Means:

- No clear record of what's been done
- Skilled operators are hard to find
- Risk of the job not being done correctly
- Wasted fuel, time, and unnecessary tyre, track, and implement wear

## How RippMaster Changes That

- Sensors measure depth, tilt, and wheel slip in real time
- Rippmaster directly commands your tractor's hydraulics – maintaining depth, level, and reducing slip
- ISOBUS display shows live depth, tilt, slip, pressure reading, and active alarms
- Maps are recorded and synced to your farm management system

## The Results

Faster, more efficient deep ripping, reduced tyre, track, and implement wear, lower fuel use, and a clear record of work completed – delivering a quick return on investment and giving you the confidence the job is completed correctly.

Talk to us about how RippMaster can transform your deep ripping
