

PTx Trimble Precision Core

Coming in 2026

High Performance Guidance at an Affordable Price.
Built to Last. Supported by Experts.

Upgrade your precision ag capabilities with Precision Core from PTx Trimble. Engineered for farmers who demand reliability, accuracy, and long-term value across their fleet, our solutions are also easy to use and quick to learn. Whether you're replacing older systems or expanding to a second vehicle, this rugged, high-performance guidance package integrates seamlessly with existing equipment and workflows.

Durable Quality

Engineered for long-term reliability in all weather and terrain conditions.

High-Performance Accuracy

Fast convergence and consistent precision with RTK, VRS, and Trimble RTX®.

Unified Architecture

Learn one user-friendly interface and use it across all machines in your operation.

Seamless Connectivity

Leverage a centralized data management platform across all devices and the cloud with included FarmENGAGE™ software.

Trusted Brand

Backed by decades of industry-leading innovation and a specialized dealer support network.

Flexible & Affordable

Designed for easy transfer between vehicles and scalable for future upgrades.

What's Included:

- Reliable and repeatable high accuracy GNSS receiver.
- Intuitive touchscreen control on a large 10-inch display.
- Smooth, hands-free guidance with high-torque steering column motor.

Perfect For:

Farmers seeking a unified, cost-effective, and highly reliable precision ag platform compatible with every machine you already own without compromising on quality or expert local support.
